Acupuncture on Embryo Transfer Day

Please contact our office prior to the day of egg retrieval, or when you have a tentative date and time for your transfer so that we may schedule your on-site acupuncture treatment.

The treatments last approximately one hour each and are performed immediately before and after the transfer.

Please make sure you notify the staff and doctor at the facility where your transfer will take place prior to the date so that they can plan and allow time for the acupuncture treatment.

For fluid ultrasound-guided transfer you will be able to sip water throughout the first treatment. You should bring a water bottle and straw to make this easier.

Reminder: Pre-paid payment plans can only be used towards regular IN OFFICE treatments. Any IUI/IVF treatments must be paid for separately.

The fee for on-site pre- and post-embryo transfer and IUI acupuncture treatment is \$150.00 per treatment payable at the time your appointment is scheduled (\$300.00 total). Payment is due two days before the procedure.

Our calendar is blocked out for your appointment. If for some reason your transfer is not cancelled one full business day prior to the scheduled day of transfer, \$150.00 will be deducted from above payment. The remaining \$150.00 can be used for future treatments.

The fee for in-office pre-IVF or pre- & post-IUI acupuncture treatments is \$100.00. Payment is due ten days before the procedure. Please note that we do not offer any in-office post-IVF treatments.

If you need to get a hold of Lisa after hours or on the weekend regarding embryo transfer or IUI, please call our office phone 801-521-0531 and when the voicemail picks up press 0 zero. The call will then go directly to Lisa's cell phone.
